

Key Steps for Responding to a Hazardous Chemical Spill

in a Research Laboratory

1 Alert co-workers.

2 Press the Emergency Ventilation button (**DO NOT** activate this button in case of **fire**).

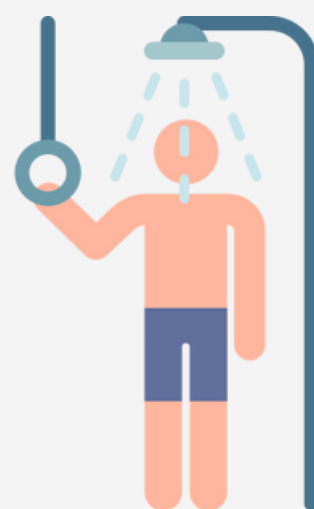

4 Inform the Security Control Centre by dialling **ext. 8999** or **23588999** from a safe location.

3 Evacuate everyone in the affected area.

5 Leave contaminated clothing or articles behind and close the door.

6 Decontaminate yourself at the nearest emergency eyewash and shower if needed.

HKUST Emergency Procedures

Please check the QR code for details on the emergency procedures at HKUST.

7 If conditions allow, **stay to assist** the emergency response team.
